- the usual charge of other Dentists or other providers in the same geographic area equal to the 90th percentile of charges as determined by MetLife based on charge information for the same or similar services or supplies maintained in MetLife's Reasonable and Customary Charge records (the 'Customary Charge'). Where MetLife determines that there is inadequate charge information maintained in MetLife's Reasonable and Customary Charge records for the geographic area in question, the Customary Charge will be determined based on actuarially sound principles.

An example of how the 90th percentile is calculated is to assume one hundred (100) charges for the same service are contained in MetLife's Reasonable and Customary charge records. These 100 hundred (100) charges would be sorted from lowest to highest charged amount and numbered 1 through 100. The 90th percentile of charges is the charge that is equal to the charge numbered 90.
